Liebert Nfinity Single Phase True Double Conversion UPS for High Availability Network and Server Power Protection

Maximum Protection for Mission Critical Network Equipment

The Liebert Nfinity UPS is a scalable 4 – 20kVA single phase UPS designed for computers, servers, hubs, routers, network switches, storage devices, radio and telecommunication systems, industrial controllers and other equipment requiring a backed up emergency power source.

The Liebert Nfinity provides advanced power protection technology by providing power conditioning and zero transfer time to battery UPS solutions for small and medium size computer and data centers and mission critical applications.

Each power and battery module are hot swappable devices that allow the Nfinity UPS to grow as your load requirements expand. Designed for N+1 redundancy capabilities on both the power and battery modules, the Nfinity UPS is your answer for emergency power requirements.

Backed by Liebert’s 24 x 7 onsite service plan, you can have Liebert engineering and quality in this compact 20” wide design. With the Liebert Nfinity, you will always be ready for the next power issue.

Nfinity Dimensions: 8 Bay 20”W x 28”D x 41”H
 12 Bay 20”W x 28”D x 58”H

**Liebert’s 4.0kVA – 20.0kVA
Nfinity Double Conversion UPS**

Liebert Nfinity UPS Features

8 and 12 Bay Chassis Designs
Two Year Onsite Warranty Standard
Automatic Voltage Regulation (+ - 2%)
Online Double Conversion UPS Design
Hot Swappable Power and Battery Modules
Wide Area Network - Remote Communications

Scalable 4 – 20kVA Designs
Zero Transfer Time to Battery
Configurable Output Distribution
Protection from Spikes and Brownouts
Long Runtime Battery Solutions Available
Optional “Wrap Around” Maintenance Bypass

For additional information and specifics on the engineering of this solution into your facility, please call the Scott Batteries office.

Company Information and Profile: SBC Data Power is a provider of batteries and high availability, emergency power systems for UPS, telecommunications, emergency lighting and other critical power applications. The company’s products and services are engineered for those with the responsibility of implementing, maintaining and supporting mission critical applications. Associated services of electrical distribution, equipment installation and equipment relocation and battery testing are also provided.

SBC Data Power provides additional solutions, including integrated battery, DC rectifier and battery chargers solutions for customers requiring 12 volt, 24 volt, 48 volt and 120 volt service applications along with battery cables, battery racks and cabinets and battery safety equipment.
