## **Liebert GXT3 5.0kVA & 6.0kVA Online Double Conversion UPS for 120 / 208VAC High Availability Power for Servers & Cisco Switches & Routers**

### **Maximum Protection for Mission Critical Network Applications**

The Liebert GXT3 5.0kVA and 6.0kVA Online Double Conversion UPS systems provide ultra reliable, advanced power protection for computers, network servers, Cisco routers and switches, storage devices, radio and telecommunication systems and other sensitive electronic equipment needing emergency backup power protection.

The Liebert GXT3 5.0kVA and 6.0kVA UPS provide power conditioning and emergency backup power by providing voltage regulation (+ - 3%) and zero transfer time to battery for equipment rooms, office deployments and medium size computer data centers with mission critical applications.

### **Providing Power Protection with New Electrical Sine Wave Output**

Liebert provides the best power protection in the industry by providing a new electrical sine wave for your connected equipment. Its online, double conversion technology (AC-DC-AC) isolates your equipment from power issues that will effect its operation. Protection from low voltage brownouts, blackouts and spikes are all encompassed in this one solution!

Extended long runtime battery cabinets are also available ensure its continuous operation even during extended power outages.

Competitively priced, now you can have Liebert engineering and quality in this compact 4U high UPS chassis that is designed for 19" or 23" equipment racks or floor or shelf mounted installation. With the Liebert GXT2 UPS, you will always be ready for the next power issue.

**Liebert's GXT2 120/208VAC UPS For High Availability Power**

**Liebert's Integrated PDU Electrical Receptacle Solution**

<b>GXT3 120 / 208 / 240 VAC Single Phase</b>	<b>Input Voltage</b>	<b>Output Voltage</b>
GXT3-5000RT208	5.0kVA / 4.0KW	208VAC
GXT3-6000RT208	6.0kVA / 4.8KW	208VAC

Note: UPS is auto sensing of either 208 or 240VAC input voltages. No adjustment needed.

### **GXT3 5.0kVA & 6.0kVA UPS System Features**

- |  |                                       |
|--|---------------------------------------|
| Rack or Tower Mounting                         | Multiple Receptacle Solutions         |
| Zero Transfer Time to Battery                  | External Maintenance Bypass Switch    |
| Online Double Conversion UPS Protection        | 4U Chassis for Equipment Installation |
| Protection from Brownouts - Power Conditioning | Wide Area Network Communications      |

**For additional information and specifics on the engineering of this solution into your facility, please call the SBC Data Power sales office.**

**Company Information and Profile:** SBC Data Power is a provider of batteries and high availability power systems for UPS, Telecommunications, Emergency Lighting and other critical power applications. The company's products and services are engineered for those with the responsibility of implementing, maintaining and supporting mission critical applications. Associated services of electrical distribution, equipment diagnostics, installation and equipment relocation and battery testing are also provided.
