UPS Rental Solutions Utilizing Systems from Liebert, Powerware and APC

Maximum Protection for Network Equipment Deployment

Scott Batteries provides rental UPS systems for emergency and mission critical computer and network equipment application requirements. Commonly, this need arises during times of temporary computer and network equipment deployment, facility maintenance and testing and during changeout of UPS systems.

Scott Batteries utilizes UPS systems from the leading manufacturers for its UPS rentals, including Liebert / Emerson Network Power, Eaton / Powerware and APC. UPS solutions deployed are available in three phase or single phase, online double conversion (AC-DC-AC) systems with custom configured runtimes.

Scott Batteries' UPS solutions include single and three phase UPS system, ranging from 2.0kVA single phase to 500kVA three phase. Supplied voltages include 120, 208, 240 and 480V systems.

All Units Tested In Office Prior to Shipping

Powerware / Eaton UPS For High Availability Power

Each UPS system is fully tested prior to each deployment to ensure uninterrupted use by each customer. Designed for ultra reliable, advanced power protection, each system provides automatic voltage regulation, power conditioning and emergency battery backup power encase of utility power failure. Many systems are leased with startup service included.

Long runtime battery solutions are also available for periods of extended power outage. Periods ranging from 30 minutes to several hours can be achieved with proper site analysis and needs determination.

Whether for transitional power during a UPS maintenance, changeout or short term equipment deployment, a Scott Batteries UPS rental can assist your business in keeping your critical equipment up and running. Please contact us for our UPS rental site questionnaire form.
